

General Consultation Package — Customer Journey (A to Z)

Customer Type

Primary Customer: Customer visits a pharmacy — or contacts the pharmacy remotely. The pharmacy sends a consultation from their subscription bundle via the Labass org portal, or sends the patient a direct online consultation link. The consultation is free to the patient; it is charged against the pharmacy's bundle.

Priority	Customer Type	Phase	Entry Point	Who Pays
Primary	Pharmacy Customer	Current 	Customer visits pharmacy → pharmacy sends consultation from their bundle (org portal) OR sends patient a direct online consultation link	Pharmacy (from their bundle); patient self-pays only if they choose to subscribe

Subscription Details — What Each Role Sees

PATIENT (USER)

After subscribing, the patient sees in their Labass app:

Field	Details
Package Name	الباقة العامة
Plan	شهري (٩٩ ريال) / كل ٣ أشهر (٢٤٩ ريال)
Subscription Start	Date of successful payment
Subscription End / Renewal	1 month or 3 months from start date
Consultations Used	Running count within the active period
Start a Consultation	”ابداً استشارة” button — available anytime
Prescription History	List of prescriptions issued under this subscription
Re-prescription	Doctor renews chronic medication on consultation close
Cancel Anytime	”إلغاء الاشتراك” — no fees, access continues until period ends

DOCTOR

When a patient enters a consultation (from pharmacy referral or as a subscriber), the doctor sees:

Field	Details
Source Badge	 “من الصيدلية — [pharmacy name]” for pharmacy-referred consultations
Subscription Badge	 “مشارك — الباقة العامة” if patient has an active subscription
Plan Type	شهري / كل ٣ أشهر
Status	نشط (Active) / منتهي (Expired)
Previous Consultations	Full list of past consultations with this patient (date, chief complaint, prescription)
Current Medications	Medications declared by the patient
Chronic Conditions	Declared conditions from intake form
City	To route prescription to the source pharmacy
Re-prescription Action	Doctor issues prescription directly inside the chat — sent to patient and pharmacy via WhatsApp

ADMIN

The admin dashboard shows all consultations and subscribers:

Field	Details
Consultation Source	Pharmacy name, pharmacist ID, timestamp
Patient Name & Phone	As entered by the pharmacist in the org portal
Doctor	Who conducted the consultation
Prescription Issued	Yes / No, with link to prescription PDF
Converted to Subscriber	Whether the patient subscribed after the consultation
Subscriber Name	Full name entered during signup
Plan	Monthly / Quarterly
Subscription Start / End	Dates
Status	Active / Expired / Cancelled
Consultations Used	Total in current period
Payment Status	Paid / Pending / Failed
Revenue	Total paid by this subscriber (lifetime)
Actions	Cancel subscription, issue refund, extend period, view consultation history

Customer Journey — Pharmacy Customer (Primary)

The customer comes to the pharmacy physically or contacts them remotely (call, WhatsApp). The pharmacist opens the Labass org portal and sends a general consultation from the pharmacy's bundle. Two sub-flows:

Sub-flow A — Customer is physically at the pharmacy. Pharmacist sends the consultation on the spot.

Sub-flow B — Customer contacts pharmacy remotely. Pharmacy sends a direct online consultation link.

1. يزور العميل الصيدلية أو يتواصل معها عن بُعد (مكالمة، واتساب)
2. الصيدلاني يفتح بوابة لاباس للمنشأة — يُدخل رقم جوال العميل — يختار "استشارة عامة" — يضغط إرسال
3. الاستشارة تُخصم من باقة الصيدلية تلقائياً — يظهر للصيدلاني عدد الاستشارات المتبقية
4. يصل إلى العميل رابط الاستشارة على واتساب: "صيدلية [اسم/الصيدلية] ترسل لك استشارة طبية مجانية من لاباس"
5. يضغط العميل على الرابط ويدخل محادثة الاستشارة
6. يقبل الدكتور الاستشارة — يرى اسم العميل، اسم الصيدلية، شارة المصدر، والاستشارات السابقة
7. يجري الدكتور الاستشارة — يناقش الحالة، يُقيم الأعراض، يراجع الأدوية الحالية
8. يُصدر الدكتور وصفة طبية إلكترونية ويغلق الاستشارة
9. تُرسل الوصفة للعميل عبر واتساب — وتُرسل نسخة مباشرة لمدير الصيدلية المصدر
10. إذا رأى الدكتور أن العميل يحتاج متابعة مستمرة، يرسل له رابط الباقة العامة داخل المحادثة
11. يضغط العميل على الرابط ويشارك — تُفعل الباقة ويُربط المصدر بالصيدلية للوصفات المستقبلية

#	Participant	Function	Action	Info Seen / Sent / Received
1	Customer	B2B	Visits pharmacy (in person or remotely). Presents medical need — medication renewal, chronic condition check, prescription request.	—
2	Pharmacist — org portal	B2B	Opens the Labass org portal. Enters patient's phone number. Selects "استشارة عامة". Clicks send.	• Consultation deducted from pharmacy's bundle automatically • Remaining bundle count shown • Source auto-tagged: pharmacy name + pharmacist ID
3	System → Customer	Tech	Sends patient a WhatsApp consultation link immediately.	• Message: "صيدلية [اسم الصيدلية] ترسل لك استشارة طبية من لاباس — اضغط هنا للبدء" + link • Link expires after 24 hours if unused
4	Customer	Tech	Clicks the link and enters the consultation chat.	—
5	Doctor	Medical	Sees the consultation in their feed. Accepts it.	•  Source badge: "من الصيدلية: [pharmacy name]" • Consultation type: استشارة عامة • Any previous consultations with this patient
6	Doctor ↔ Customer	Medical	Conducts consultation. Discusses chief complaint, current medications, chronic conditions. Assesses clinical need.	—
7	Doctor	Medical	Issues electronic prescription. Closes consultation.	• Patient receives: prescription PDF via WhatsApp • Pharmacy manager receives: same prescription PDF via WhatsApp (routed to source pharmacy automatically)

#	Participant	Function	Action	Info Seen / Sent / Received
8	Doctor (<i>optional</i>)	Medical	If ongoing care is needed: sends the general package subscription link inside the chat.	• Doctor shares <code>/general-Package</code> link in chat • أنصحك بالاشتراك في الباقة العامة "للمتابعة المستمرة"
9	Customer (<i>optional</i>)	Sales	Clicks the general package link. Subscribes (plan → info → OTP → pay).	—
10	System (<i>optional</i>)	Tech	Subscription activated. Source linked to pharmacy. Future prescriptions continue routing to source pharmacy.	• Subscription source = pharmacy [name] •  "مشارك — الباقة العامة" badge on all future consultations
11	Admin	Ops	Sees consultation in dashboard. If patient subscribed, sees new subscriber row.	• Consultation: pharmacy name, patient phone, doctor, prescription issued, timestamp • Subscriber (if converted): name, plan, source=pharmacy, start/end date, consultations used

Subscription Lifecycle

```

Pharmacy Consultation → Doctor Recommends Package → Patient Subscribes
↓
Active Subscription → Consultation anytime → Prescription → Source Pharmacy
↓
Renewal Reminder (7 days before) → Renew or Cancel

```

Stage	Patient	Doctor	Admin
Pharmacy consultation	WhatsApp link → chat → prescription	Source badge, pre-prescription issued	Consultation logged, pharmacy attributed
Just subscribed	Confirmation WhatsApp + consultation link	—	New subscriber row
Active	”ابدأ استشارة” anytime	Subscription badge + full context	Consultations count increments
7 days before expiry	Renewal reminder WhatsApp	—	Upcoming expiry flagged
Expired	”جدد اشتراكك” prompt	Expired badge	Status = Expired
Cancelled	Access until end of period	—	Cancellation date logged
Renewed	Seamless — new period starts	No change	Renewal recorded, new end date
